

## **SWITCHOVER BEGINS FOR TOROSAY VIEWERS**

*Freeview viewers reminded to retune as signal is boosted to reach all areas*

**All Freeview viewers in the south west Highlands and Islands will need to retune their TVs and boxes today as the digital switchover gets underway.**

Shortly after midnight, analogue BBC Two was turned off permanently at the Torosay transmitter and engineers started switching on digital signals at 22 relay transmitters serving thousands of homes. These households will be able to receive Freeview for the first time today.

The changes also affect existing Freeview viewers who may find their BBC TV channels are missing. These services have moved to new frequencies and can be restored by retuning Freeview TVs and boxes.<sup>1</sup>

The second and final stage of switchover takes place on **27 October** when the remaining analogue channels will be switched off permanently. On this date, further Freeview channels from STV, Channel 4 and Five will also become available from relay transmitters for the first time.

The Switchover Help Scheme is still welcoming applications from eligible older and disabled people to get help to convert one television, including a choice of equipment, installation and aftercare. For those who have already signed up, the Help Scheme call centre is available to help with any problems and can be contacted on 0800 40 85 900.

Paul Hughes, Digital UK's National Manager for Scotland, said this morning: "Switchover in the south west Highlands and Islands is underway, and many people are receiving Freeview channels for the first time.

"We're now encouraging any viewers who still don't have the necessary equipment to get ready in time for 27 October, when all the analogue channels will be permanently switched off. Anyone who needs advice during this period should contact Digital UK or sign up for the Help Scheme if they are eligible."

Digital UK, the body leading switchover, continues to provide support through local advice points, as well as its website and advice line. A switchover roadshow is also running today in Oban, outside Boots, George Street, Oban, PA34 5NL from 9am-5pm.

## Notes to editors

### 1. Retuning

#### How to retune your Freeview, Top-Up TV or BT Vision equipment:

- Switch on your digital box or digital television.
- Press 'menu' on the remote control.
- Select 'set up' or 'installation' option.
- Select 'first time installation' option (sometimes called 'factory reset', 'full retune' or default settings').
- Press "OK" if your equipment asks if you want to delete all your channels - don't worry, this is normal.
- Channels will be automatically installed. This may take a few minutes; your equipment may shut down and restart.

These instructions are a guide only – each product works slightly differently. For more information on retuning visit [digitaluk.co.uk/retuning](http://digitaluk.co.uk/retuning)

- 2. Channel swaps:** From today, due to a change in broadcast frequencies, some viewers may find that one of their analogue channels moves to a different button on the remote control. All the analogue channels will be switched off permanently at stage two.
- 3. The Switchover Help Scheme:** People aged 75 and over, eligible for certain disability benefits, registered blind or partially sighted or living in care homes are entitled to practical help from the BBC-run Switchover Help Scheme. For £40, they will be given equipment to switch one TV per household to digital. They will be able to have that equipment installed if they want it, a demonstration of how it works and a number to call while they get used to things. If they're eligible and also on income-related benefits, the help will be free. Everyone eligible will be contacted directly before switchover. More information is available on 0800 40 85 900 and online at [helpscheme.co.uk](http://helpscheme.co.uk).

**Digital TV switchover** is the process of converting the UK's terrestrial television system to digital. Between now and 2012, analogue channels are being switched off region by region and replaced with free-to-air digital TV and radio services (Freeview). Switchover will extend Freeview coverage virtually to the whole of the UK and free up airwaves for new services such as ultra-fast wireless broadband and mobile television. Digital services are also available via broadband, cable and satellite.

**Digital UK** is the independent, not-for-profit organisation established in 2005 to lead the implementation of digital switchover. It is jointly owned and funded by the public-service broadcasters (BBC, ITV, Channel 4, Five and S4C), and the digital multiplex operators.

**The Switchover Help Scheme** is run by the BBC under an agreement with the Government to help older and disabled people make the change to digital TV. More information is available from [helpscheme.co.uk](http://helpscheme.co.uk).

**Images and video clips** are available to media free of charge from [vismedia.co.uk](http://vismedia.co.uk).
