

ANALOGUE NO MORE IN SOUTH-WEST WALES

Freeview signals move to full power as switchover completes

The final stage of digital TV switchover in South West Wales will complete on Wednesday 16 September, extending digital terrestrial television (Freeview) coverage to all households served by the Preseli transmitter group.

All terrestrial TV signals will be turned off shortly after midnight and analogue services will remain switched off permanently, allowing new Freeview channels to be broadcast from 27 local relay transmitters serving areas such as St. David's and Llandysul for the first time.

When the transition is completed by around mid afternoon, Freeview, BT Vision and Top Up TV equipment should be retuned in order to receive all the channels available.¹

Because broadcasters are planning changes to the Freeview service over the autumn, viewers should continue to retune whenever their channel line-up changes in order to keep their equipment up to date.²

Switching off the analogue signal makes it possible to extend the level of Freeview coverage to reach 98 per cent of homes in Wales. Viewers receiving their signal from relay transmitters will see the number of TV channels available free via an aerial increase from four to around 20 (see notes).

Digital TVs or analogue sets converted with a digital box will be able to receive BBC One, BBC Two, ITV1, S4C, Channel 4 and Five, plus additional digital channels such as BBC Three, BBC Four, BBC News, ITV2, ITV3, More 4 and digital text and radio services.

Emyr Byron Hughes, Digital UK's National Manager for Wales, said: "From Wednesday many more viewers will be able to receive digital TV free via an aerial. People in South West Wales have responded really well in adapting to the change and preparing in good time."

Digital UK, the independent body leading switchover, continues to provide support through local advice points (see notes), its website (digitaluk.co.uk) and helpline (08456 50 50 50). A switchover roadshow is also running today in Queensferry at Deeside Leisure Centre, Chester Road.

The Switchover Help Scheme is still welcoming applications from eligible older and disabled people to get help to convert one television – including a choice of equipment, installation and aftercare. Eligible people who have already converted a TV set without assistance can still apply to convert a second set. Help Scheme engineers will be working in the area over the switchover period to help with retuning and viewers can contact the Help Scheme on 0800 40 85 900.

- ends; notes follow -

Notes to editors

1. To retune your Freeview, Top-Up TV or BT Vision equipment, follow these steps:

Note: These instructions are a guide only – each product works slightly differently. Your instruction manual will explain the process for your particular product. Make sure you do a full retune following the guide below. Some product menus have 'add channels' or 'auto search' functions which may not restore all channels.

- Switch on your digital box or digital television
- Press 'menu' on the remote control
- Select 'set up' or 'installation' option
- Select 'first time installation' option (sometimes called 'factory reset', 'full retune' or 'default settings')
- Press "OK" if your equipment asks if you want to delete all your channels - don't worry this is normal.
- Channels will be automatically installed. This may take a few minutes; your equipment may shut down and restart.

For more information on retuning visit digitaluk.co.uk/retuning

2. On 30 September, all UK Freeview viewers will need to retune, as several changes will be made by broadcasters to the channel line-up.

Advice points

Switchover advice points are running at the following locations on 16-17 September, from 10am to 4pm:

Tenby: The De Valence Theatre Foyer, Upper Frog Street, Tenby SA70 7JD

Camarthen: Carmarthenshire Assoc'n of Voluntary Services, The Mount, 18 Queen Street, Camarthen

Haverfordwest: Pembrokeshire Assoc'n of Voluntary Services, 36-38 High Street, Haverfordwest SA61 2DA

Cardigan: Age Concern Ceredigion, 38 Pendre, Cardigan SA43 1JS

Digital TV switchover is the process of converting the UK's terrestrial television system to digital. Between now and 2012, analogue channels will be switched off region by region and replaced with free-to-air digital TV and radio services (Freeview). Switchover will extend Freeview coverage to the whole of the UK and free up airwaves for new services such as ultra-fast wireless broadband and mobile television. Digital services are also available via broadband, cable and satellite.

Digital UK is the independent, not-for-profit organisation established in 2005 to lead the implementation of digital switchover. It is jointly owned and funded by the public-service broadcasters (BBC, ITV, Channel 4, Five, S4C and Teletext), and the digital multiplex operators.

The Switchover Help Scheme is run by the BBC under an agreement with the Government to help older and disabled people make the change to digital TV. Every eligible person will be offered practical help to convert one of their TV sets to digital in the run-up to switchover in each region. People are eligible if they are aged 75 years or more, have lived in a care home for six months or more, get (or could get) certain disability benefits, or are registered blind or partially sighted. Most people will be asked to contribute £40 towards the help but for those on certain income-related benefits, it's free.
