Trade and Industry Information

700MHz Clearance Events

STV Region

Following a decision by Ofcom, spectrum in the 700MHz UHF band currently used for digital terrestrial television (DTT) is being reallocated for the development of future mobile services. Some DTT multiplexes will be moving to new broadcast frequencies as a result of this change.

Engineering work for the 700MHz Clearance Programme will take place at transmitters across the UK between 2017 - 2020. Freeview viewers (and those with other services that use Freeview channels, such as YouView) will need to retune their TV equipment when changes take place in their area. This document lists the currently announced clearance events for the STV region and will be updated as new information is released. Details of the changes to transmitters will also be reflected on our coverage checker at digitaluk.co.uk/coveragechecker.

Note: Where multiplexes are moving we have included the current and future aerial group required to receive Freeview services. Digital UK recommends installers fitting new aerials use a wideband model where possible to accommodate future changes to broadcast frequencies.

26 July 2017

Bressay – some relay stations only

23 August 2017

Knockmore – main and some relay stations

Rumster Forest – main and some relay stations

6 September 2017

Rosemarkie – some relay stations only

20 September 2017

Eitshal – some relay stations only

Skriaig – some relay stations only

4 October 2017

Torosay – main and some relay stations
