

Make a Digit AI finger puppet

You will need...

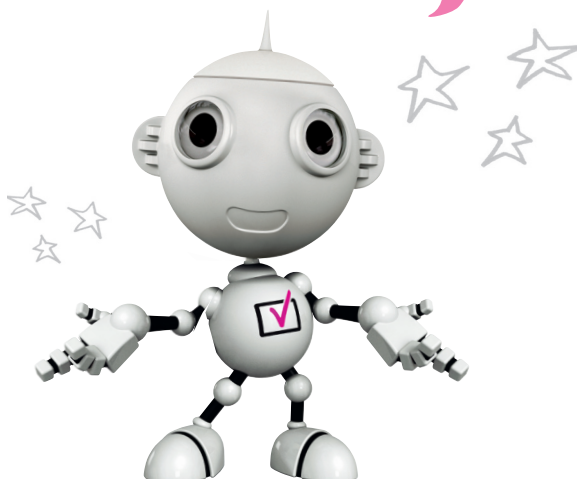

Glue, card,
scissors, colour
pens and pencils

Digit AI loves to be the star of the show when it comes to telling everyone about the digital TV switchover, but now it's your chance.

Make your own Digit AI finger puppet and create a TV inspired puppet show to tell all your friends and family about television in the past, the present and the future.

Make sure you are careful when using scissors.

- 1** Glue the template onto a piece of card and leave it to dry.
- 2** Now decorate your Digit AI finger puppet to make him come to life.
- 3** Carefully cut out the finger puppet. It should be nice and stiff now that it is glued to the card.
